

#MadeinIndia

Virtualization, HCI, Storage and Private Cloud Solutions

Xloud – Team & History

Xloud is an Indian Cloud infrastructure technology company that helps organizations with data center and cloud infrastructure technology stack for digital transformation and innovation at cloud, on-premises or both.

Our team of specialists carries great experience in deploying, managing and maintaining open-source backed private clouds of over 15 years. Our tech team further helped big industry giants in their IT and Cloud DevOps, automations, Security, and management.

Our team have worked on Private Cloud projects for:

Product Portfolio

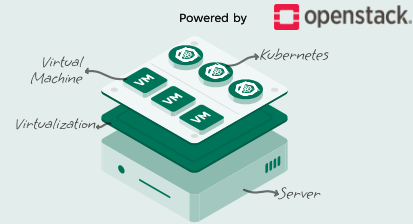

Software defined Datacenter solutions

- Agility and Flexibility
- Hardware agnostic
- Cost Efficiency and Scalability

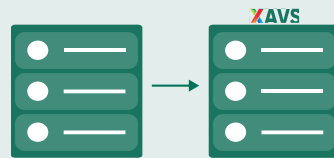

XAVS #Virtualization

- Unified Management Portal
- VM HA, Live Migration
- Kubernetes ready
- VM Encryption

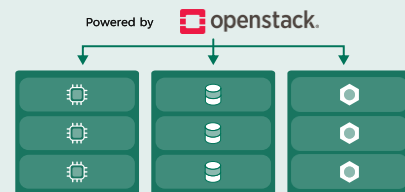

XDRS #DR & MIGRATION

- Low RPO and RTO
- DR Automation
- Automated Backup (Incremental & Full)

XPCI #Private Cloud Infrastructure

- Multi-Tenancy
- Infrastructure as Code
- Performance Optimization
- Hardened Security

XSDS #Software-defined-storage

- File, block and object storage in single system
- Replicates data in objects to make it fault-tolerant.
- Self-healing & self-management
- Distributed operation with no Single-Point-of-Failure

Appliance solutions

- Hardware shipped with our loaded software
- Built together with Dell Technologies OEM Solutions
- Plug-and-Play Simplicity

Designed and Build with:

Dell Technologies

OEM Solutions

XNAS #Safety & Surveillance data storage box

- Snapshots and Cloning
- Scalable Architecture
- Thin Provisioning
- File Deduplication & Compression

XNEXUS #Unified Data storage system

- Unified Storage
- Self-Healing
- Distributed Architecture

XHCI #Hyper Converged Infrastructure

- Unified Management Portal
- VM HA, Live Migration
- Kubernetes ready
- VM Encryption

What makes Xloud dependable

Empowering businesses to scale economically and develop with confidence for critical applications with the utmost confidence

01

Robust & proven tech

Utilize top-tier technology for with best-in class support.

03

Make in India compliance

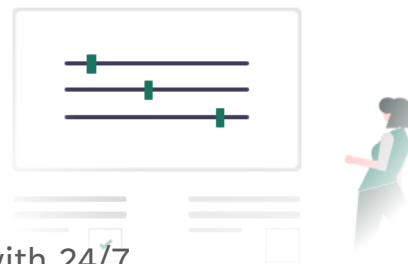

Ensure robust protection for client data with top-tier privacy & security.

02

24/7 Direct on-call customer support

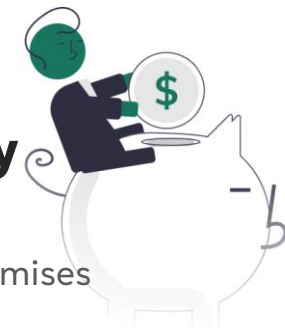

Boost efficiency & satisfaction with 24/7 support.

04

High Value for money

Fixed-cost models using on-premises infrastructure

Defense

Secure, scalable IT solutions to enhance data security, reliability, & system integration for the Indian defense sector.

BFSI

Ensure data security, scalability, and compliance for financial applications and transactions in the cloud.

Power & Utility

Optimize resource utilization and enable real-time control through cloud-based data management and IoT.

E-Sports

Deliver high-performance gaming experiences, host gaming platforms, and organize tournaments in the cloud.

Education

Enhance remote learning, student engagement, and learning outcomes through scalable and reliable cloud-based solutions.

Manufacturing

Support Manufacturing process with cloud-based simulations, data storage, and real-time control capabilities.

Pharmaceutical

Enable secure storage and analysis of medical data, ensuring compliance and research support.

Gen AI

Accelerate AI development with cloud resources for training and deploying AI models.
